Christopher Joshy

Bachelor of Technology in Computer Science Engineering

christopherjoshy4@gmail.com · github.com/christopherjoshy · linkedin.com/in/christopherjoshy-272a77290 · Kerala, India

PROFESSIONAL SUMMARY

Ambitious Computer Science Engineering undergraduate at SJCET Palai (2023–2027) specialising in AI/ML, multi-agent systems, and scalable backend architecture. Kaggle Silver Medalist (Top 3 % globally, NVIDIA Nemotron Challenge, 2026) with hands-on experience building production-grade AI platforms, computer-vision systems, and full-stack applications. Proven technical leader as Nexus Tech Lead, organising hackathons, mentoring student developers, and driving institutional software initiatives. Seeking a software-engineering or AI-engineering role where I can deliver real-world impact through intelligent, well-engineered systems.

KEY ACHIEVEMENTS

- **Kaggle Silver Medal** — NVIDIA Nemotron Model Reasoning Challenge (June 2026): Ranked **130 / 4,182 teams** worldwide (Top 3 %). Designed and optimised advanced prompt-chaining topologies and multi-step reasoning heuristics over the Nemotron model ecosystem.
- **1st Place** — IEEE CS SIGHT Society Website Competition 2026: Delivered a fully accessible, WCAG-compliant, production-ready web platform judged best in the competition.
- **Hackathon Finalist & Innovator (2025–2026)**: Selected finalist at Techashy 2026 (IIIT Kottayam); presented at Hexinox GEN.AI industry tracks; shipped an MVP at the OpenAI & Outskill 7-Day AI Builders Hackathon; built a satellite-data engine for NASA Space Apps Challenge.

TECHNICAL SKILLS

Languages	Python · Rust · TypeScript · JavaScript · C · C++ · Java · C# · Lua/Luau
AI / ML	PyTorch · TensorFlow · Multi-Agent LLM Frameworks · Prompt Engineering · Deep Learning · Computer Vision
Backend	FastAPI · Node.js · Express.js · RESTful APIs · OAuth2/JWT · Microservices Architecture
Frontend / Mobile	React · Next.js · Tailwind CSS · Flutter · React Native · HTML5 · CSS3
Databases	MongoDB · Redis · Apache Cassandra · Firebase · SQL
CV & Sensing	OpenCV · MediaPipe · Real-Time Gesture Recognition · Image Processing
DevOps / Tools	Git · GitHub · Docker · Linux (Arch) · VS Code

EDUCATION

B.Tech in Computer Science Engineering — SJCET, Palai 2023 – 2027

St. Joseph's College of Engineering and Technology, Palai

CERTIFICATIONS

For a full list of professional certifications, licenses, and course completions, please refer to the **Licenses & Certifications** section on my LinkedIn profile: **linkedin.com/in/christopherjoshy-272a77290**

EXPERIENCE

Nexus Tech Lead — SJCET, Palai 2025 – Present

Student Technical Leadership Role

- Spearhead institutional technical initiatives, architecture reviews, and peer developer engagement tracks.
- Coordinate multiple student development teams, instituting Git branching strategies, code reviews, and software-engineering best practices.
- Organise college-wide hackathons and workshops; mentor students on full-stack and machine-learning pipelines.

Software Engineering Intern — Pacelab, Kochi 1 Month (2025)

Industry Internship

- Worked within enterprise Agile/Scrum workflows; assisted in software-lifecycle tasks including debugging and structured version control.

- Gained hands-on exposure to CI/CD integration pipelines, containerised testing environments, and collaborative code-review processes.

FEATURED PROJECTS

A.U.R.A. — AI Healthcare Platform 2026

AI-powered smart healthcare ecosystem custom-built for dementia and Alzheimer's patients. Integrates real-time facial recognition, voice-interaction nodes, medication reminders, caregiver monitoring with push alerts, and edge-computed IoT emergency response.

Stack: React Native · FastAPI · OpenCV · MediaPipe · Raspberry Pi · IoT Hub

MedOS — Clinical Multi-Agent Reasoning Engine 2026

Non-linear multi-agent medical reasoning platform built on a custom swarm architecture. Orchestrates parallel sub-agent execution for highly accurate diagnostic lookups and medical logical consistency checking.

Stack: Python · FastAPI · LLM Swarm Orchestration · Multi-Agent Frameworks

VoiceShield — Deepfake Voice Detection 2026

Deep learning audio classification system that detects AI-synthesised deepfake voice fraud targeting banking-grade voice-authorisation flows. Trained on multi-source audio datasets with high precision at low latency.

Stack: PyTorch · Librosa · Audio Signal Processing · Deep Learning Classification

Ghosted — Autonomous Ethical Penetration Testing Framework 2026

LLM-driven offensive security framework that automates safe attack-surface mapping, parameter mutation checks, and structured mitigation reporting for ethical web pen-testing.

Stack: Python · Network Security Protocols · LLM Reasoners · Bash Automation

PROJECT H.Y.D.R.A. — Environmental Monitoring 2025

Satellite-data-driven platform for detecting harmful algal blooms, built for the NASA Space Apps Challenge. Ingests multi-spectral NASA EarthData imagery and renders real-time regional risk heatmaps via interactive dashboards.

Stack: Python · Streamlit · NASA EarthData APIs · NumPy · Spatial Data Processing

CiCaWa HashITup — Circular Waste Economy Platform 2025

Full-stack waste-management platform featuring computer-vision-driven waste classification, a peer-to-peer materials marketplace, and community impact-tracking dashboards.

Stack: Next.js · FastAPI · MongoDB · Image Classification Pipelines

KK Notes Ecosystem — Academic Resource Platform 2025

Widely-used student resource exchange system combining a unified web portal with an automated Telegram bot for high-throughput file distribution and notes management.

Stack: React · Express.js · MongoDB · Telegram Bot API · Python

DevQuest — Gamified RPG Portfolio 2025

Medieval RPG-inspired portfolio interface with stateful quest maps, dynamic progression rendering, and technical achievement tracking. Showcases engineering work in an interactive narrative format.

Stack: React · TypeScript · Tailwind CSS

ADDITIONAL PROJECTS

AI & ML: AI Maveli (generative cultural AI) · ResumAI (ATS resume optimiser) · GitDocGenAI (automated repo documentation) · MaestraMind (AI orchestration assistant) · WikiRunAI (AI-powered knowledge graph search)
Computer Vision: Hando (real-time hand-gesture game control via OpenCV/MediaPipe)
Bots & Automation: Polaris Bot (Discord RPG systems bot) · KTU Notes Telegram Bot · ChrisTheTrader (algorithmic crypto backtester)
Mobile & Web: Orix Ecosystem (college ride-sharing app, Flutter + Firebase + FastAPI) · Orito (AI-assisted Linux helper, Node.js/TypeScript) · Typelo (1v1 competitive typing platform)

AREAS OF INTEREST

Autonomous Multi-Agent Orchestration · Machine Learning Infrastructure · Advanced Deep Learning & Computer Vision · High-Performance Backend Architecture · Distributed Systems & Systems Programming · Open Source Contribution · Competitive Programming
